METERING

POLICY

It shall be the policy of M.J.M. Electric Cooperative, Inc., to sell metering equipment to Members of the Cooperative, to be used on MJM lines only, at cost in order to promote the upgrading of the Member's wiring and to facilitate the connection of new services as soon as line construction is completed.

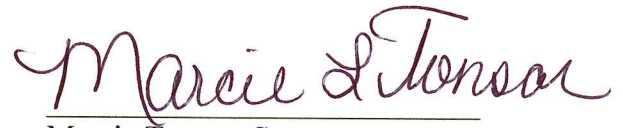

RESPONSIBILITY

President/CEO & Management

PROCEDURE

1. MJM will offer for purchase 100-amp, 200-amp, and 320-amp, single phase, protected disconnect metering . The Cooperative shall require a protected disconnect under the meter on all direct metered services. Metering can be sold to the Member at an amount determined by cooperative staff from time to time.
2. Members will have the option of purchasing meter loops from the Cooperative or an electrician if they indicate that they would rather purchase same, constructed according to Cooperative specifications, from their regular electrician.
3. In the case of current transformer metering, the Cooperative will install, connect, maintain, and retain ownership of the current transformers and meter loop.
4. The Cooperative will install and connect the pole mounted meter loop constructed to Cooperative specifications by the Member's electrician provided the completely assembled meter loop is available at the site when Cooperative's line construction is being completed.

5. If a pole mounted meter loop is being replaced by a new pole mounted meter loop constructed to Cooperative specifications by the Member's electrician, and no changes are needed on Cooperative facilities, the Cooperative will connect the new meter loop after the electrician has installed the new meter loop on the existing meter pole.
6. Monthly billing for the service will begin as soon as the service is connected.
7. All invoices for metering equipment, if not paid in advance, shall be considered "30-days cash". Past due invoices will be automatically transferred to an active billing account which may result in a temporary interruption of service until the debt is paid.
8. Emergency replacements will be installed and invoiced to the recipient within 30 days of completed work.

Marcie Tonsor, Secretary
