JUNE CALENDAR

June is National Safety Month

June 12: MJM's 86th Annual Meeting

June 9-15: ROW Professionals Week

June 14: Flag Day

June 15: Father's Day

June 20: First Day of Summer

UPCOMING

July 4: Office Closed

HOLIDAYS OBSERVED:

New Year's Day, Good Friday, Memorial Day, Independence Day, Labor Day, Veterans Day, Thanksgiving Day, the day following Thanksgiving, Christmas Eve, Christmas Day, and New Year's Eve.

OFFICE: 217-707-6156
FAX: 217-854-3918

HOW EXTREME SUMMER TEMPS IMPACT RELIABILITY

BY MJM PRESIDENT/CEO, JOE HEYEN

When outdoor temperatures soar, our electricity use increases. That's because our air conditioners are running longer and more often to counteract sweltering outdoor temperatures. Factor in that we all tend to use electricity at the same times—in the morning and early evenings—and that equals a lot of strain on our electric grid.

At MJM, we work closely with Wabash Valley Power Alliance, our generation and transmission (G&T) cooperative in resource and infrastructure planning to ensure you have the power you need whenever you flip a switch, but the electric grid is much larger than your local co-op and G&T.

In summer months, when even more electricity is being used simultaneously across the country, it is possible for electricity demand to exceed supply, especially if a prolonged heat wave occurs. If this happens, which is rare, the grid operator for our region of the country may call on consumers to actively reduce their energy use or initiate rolling power outages to relieve pressure on the grid. MJM will always keep you informed about situations like this.

We work proactively with our G&T to create a resilient portion of the grid and ensure electric reliability in extreme weather, including regular system maintenance, grid modernization efforts and disaster response planning; but it takes everyone to keep the grid reliable.

To help keep the air conditioner running for you, your family and neighbors, here are a few things you can do to relieve pressure on the grid during times of extreme summer heat:

- Select the highest comfortable thermostat setting and turn it up several degrees whenever possible. **Your cooling system must run longer to make up the difference between the thermostat temp and the outdoor temp.**

Pro tip: Seal air leaks around windows and exterior doors with caulk and weatherstripping. Air leaks and drafts force your cooling system to work harder than necessary.

- Run major appliances such as dishwashers, ovens and dryers when the regional demand for electricity is lower.

Pro tip: Start the dishwasher before you go to bed.

- Use ceiling fans to make yourself feel a few degrees cooler. Remember, ceiling fans cool people (not rooms), so turn them off in unoccupied rooms.

*Pro tip: During summer months, set ceiling fan blades to rotate **counterclockwise**, which pushes cool air down for a windchill effect.*

- Close blinds, curtains and shades during the hottest part of the day to block unwanted heat gain from sunlight.

Pro tip: Consider blackout curtains with thermal backing or reflective lining to block heat and light.

- Use smaller appliances, such as slow cookers, air fryers and toaster ovens to cook meals.

Pro tip: Studies have shown that air fryers use about half the amount of electricity than a full-sized oven. Air fryers are smaller and use focused heat, which results in faster cooking times, less heat output and lower energy use.

As we face the challenges posed by soaring summer temperatures, understanding the impact on energy demand is crucial for maintaining a reliable power supply. By adopting energy conservation practices during periods of extreme heat, not only can you save money on your electric bills, but you can also contribute to the resilience of the grid, keeping our local community cool and connected.

ALONGTHELINES

by MJM Electric Cooperative
www.mjmec.coop

**18300 SHIPMAN ROAD, PO Box 80
CARLINVILLE, IL 62626**

OFFICE: 1-217-707-6156

OFFICE HOURS:

Monday - Friday 7:30 a.m. - 4:00 p.m.

HOW TO REPORT AN OUTAGE:

Call **217-707-6156** or use your **SmartHub app**.

- When you report an outage, give your **name** and **location number**.
- Before calling, check your fuses or circuit breakers.
- Check with your neighbors. Call to report hazardous conditions.

Please do not report outages on Facebook/Social Media.

TIPS TO AVOID ENERGY SCAMS

Some scammers will pose as utility workers or contractors affiliated with your electric utility by knocking on your door and claiming to be employed or hired by the utility company. They may claim they were hired to reset, repair, replace or inspect your electric meter or other utility-related device. If a utility employee or authorized contractor needs access to your home, we will schedule an appointment in advance, and proper identification will be provided for your review.

CONVENIENCE WITH MEMBERS IN MIND

PAYMENTS MADE EASY

MJM offers a variety of payment options with the Member's best interest in mind:

SmartHub App: Download the app from your app store to your phone or tablet. You may make payments, set up autopay, update stored payment information, and more.

Auto pay: Payments are automatically charged to a debit/credit card or checking account on the 15th of the month and the bill is still generated as usual for your records. Set up card or check payments by logging into your account on SmartHub. The billing department can assist with setting up checking account payments as well, but not cards.

Drive Thru: If you do not require a payment receipt or want to pay after normal business hours, you have the option to submit your payment in a secure drop box located under the drive-thru awning which is built right into the building. This drop-off option is available 24/7 for your convenience.

Pay-by-Phone - Interactive Voice Response (IVR)

System: Pay via phone by calling our general number (217) 707-6156 and pressing option 1. Keep in mind, IVR is a separate system from SmartHub and may not have matching stored payment methods on file.

MJM's Website www.mjmec.coop: Visit our website and login to your full SmartHub account or use **Quick Pay**. If someone is making an electronic payment on your behalf, **Quick Pay** is a good option to consider using.

Cash Payments using *Vanilla Direct: You must login to SmartHub to pay with cash at places other than MJM's office in Carlinville. Under Bill & Pay choose Pay by Cash and enter your zip code to discover approved

payment locations in your area. On the same screen, you will need to use the special bar code provided to make payments which can be printed or displayed on your electronic device. There is a \$1.50 convenience fee required to use this service. (*Note: Unfortunately, some approved stores have not provided adequate training for their employees and therefore, they will not be able to assist you. It is recommended that you call the store ahead of time to verify.)

Mailed Check: This method of making a payment is still available, however the risk of posting your payment later than expected has become a common issue due to United States Postal Service delays that are out of MJM's control. Please keep that in mind if you desire your payment to arrive by a certain date.

Overall, when making a payment, we encourage members to pay with an electronic check as this option is less expensive to the Cooperative as compared to fees related to credit and debit card transactions. Checking account payments may be processed as a one-time payment or recurring monthly auto payments.

MONTHLY BILLING TIMELINES:

Each month, a bill cycle is processed on the 1st of the month (or the next business day if on a Sunday or an observed holiday) and the new bill amount is available to members

the following day. A bill cycle runs from the 1st of the month to the last day of the month.

The bills are mailed out of St. Louis where they are printed. If you have been receiving your bills late in the mail, please consider using SmartHub to view the bill. You can also switch to paperless bills and print them on your own when needed.

Payments are due by the 15th of each month. If an account becomes past due, the gross amount is owed in full after 4pm on the 22nd and must be paid no later than the 8th day of the following month to avoid an interruption in service and additional charges. See your billing statement for more details.

HOME ELECTRICAL SAFETY

"HOME SAFE HOME" BY SAFELECTRICITY.ORG

May was Electrical Safety Month, and according to the U.S. Fire Administration, faulty home electrical wiring causes more than 24,000 residential fires a year, hundreds of deaths, and thousands of injuries. Unfortunately, electrical hazards often go unaddressed until it is too late. Safe Electricity has the following tips to help you find and correct hazards that may be lurking around the home:

Check electrical outlets for loose-fitting plugs that can cause shocks or start fires. Replace missing or broken wall plates, so the inner wiring components are not exposed.

If you have young children, use safety covers on unused outlets. Consider installing tamper-resistant receptacles with a built-in shutter system that prevents hairpins and other small objects from being inserted into the outlet. Check the cords of the appliances in your home, as well as the plugs and connectors. Make sure they are not frayed, cracked or damaged, placed under rugs or carpets, resting on furniture, or in high traffic areas. Do not nail or staple cords to walls, floors, or any other objects.

Extension cords should be used on a temporary basis only. They are not a permanent wiring solution. Have additional outlets installed where you need them. If you are using extension cords, make sure they have safety closures to protect young children from shocks or mouth burns.

Never use an indoor extension cord for outdoor use. Use an extension cord specifically for outdoors; they are heavier and less likely to be damaged.

Check your electric panel to make sure the breakers and fuses are properly rated for the circuit they are protecting. Have a qualified electrician identify and label the correct size to be used if you are unsure. When replacing a fuse, use the same size.

Check light bulbs and appliances to make sure the wattage matches fixture requirements. Do not replace bulbs with higher wattage than recommended. The bulb should be securely screwed in to prevent overheating. If an appliance repeatedly blows a fuse, trips a circuit breaker, or gives you an electrical shock, immediately unplug, repair, or replace it.

Check for or install ground fault circuit interrupters (GFCIs). A GFCI is an inexpensive electrical device that shuts off power instantly if there is a problem. GFCIs should be installed in all "wet" areas of the home, such as bathrooms, kitchens, and basements.

GFCIs should be tested monthly to ensure they are working properly. The Consumer Product Safety Commission estimates GFCIs could prevent more than two-thirds of the roughly 300 electrocutions that happen each year in the home.

Consider installing arc-fault circuit interrupters (AFCIs) on bedroom circuits, have smoke detectors in all bedrooms and in hallways within 15 feet of bedrooms, and at least one smoke detector on every level. Carbon monoxide detectors should also be within 15 feet of each bedroom. As always, check with your local electrical inspector if you have questions or concerns.

Inspect all outdoor connections, appliances, and tools for frayed cords, broken plugs, and cracked or broken housings. Repair or replace damaged cords and appliances.

Electricity.org**

UNCLAIMED CAPITAL CREDIT CHECKS

In December 2024, MJM returned \$647,246 in capital credit allocations to members who purchased electricity from MJM in **1985, 1986, and partial of 1987**. MJM sent checks to inactive members and mailed them to the last known valid address on file. As of April 2025, the list below contains the names of members whose checks were returned to MJM by the post office because of incorrect addresses, or whose checks were not cashed.

Members on this list should contact MJM and provide an updated address so that the check may be reissued. If one of your relatives is on the list and he or she is deceased, we are able to rewrite the check in the name(s) of the member's heir(s). Retired Capital Credits will be automatically abandoned after two years of being unclaimed.

The paperwork can be found online at [mjmec.coop](#) under the Billing Tab > What are Capital Credits? You may also contact MJM directly to request that MJM mail you the paperwork. Early estate retirements are also available allowing families to obtain their family member's remaining capital credits at a discounted rate.

If you need assistance or have questions, please call 217-707-6156

Capital Credits: Are they considered taxable income?

If you are a residential customer, you will only recieve a 1099 tax form from MJM if your Capital Credit check is more than \$600.

If your electric service is for business purposes, and payments for electricity are deductions in the calculation of taxable income, Capital Credits will affect your income tax liability. You may want to consult with your tax advisor.

CAPITAL CREDITS: EARLY RETIREMENT OPTION

FORMER AND CURRENT MEMBERS:

MJM is offering a new opportunity to request an early retirement of capital credits at a discounted rate to all members (former and current). Requests for a discounted early retirement will be accepted between March and August of this year and paid on a first-come, first-serve basis until reaching the board approved budgeted amount. A co-op provided form must be completed, notarized, and submitted to the office acknowledging the terms of this payout. Once paid out, capital credits previously allocated will be forfeited, and the capital credit accumulation will start over at \$0.

This early payout opportunity is optional and not required. It is a choice in which each member must weigh the benefits of waiting for regular capital credit retirements to occur or accepting a discounted amount now. For example, because capital credits are reinvested into the co-op and eventually paid out, a member who started their co-op membership in 2020 will likely wait 30+ years to receive a payout of any kind. Someone who started service in 2008, may have to wait nearly 10 years from now.

The early payout amount must be calculated and quoted to each member individually. The main factors that will affect the payout amount is related to the age of the capital credit and the number of kilowatts consumed in each related year. When considering this early discount option, please note that newer/younger capital credits (i.e. 2022, 2023, etc.) will be discounted more heavily.

For additional information or to be added to the early payout request que, submit your information using the google form link on our website or call 217-707-6156 and press option 2 during normal business hours.

18300 Shipman Road, Carlinville, IL

*The business meeting will begin at 6:35pm after the drive-thru event. Parking is available.

Bring your Annual Meeting Booklet for easy registration and voting!

ENERGY EFFICIENCY TIP OF THE MONTH

Take advantage of the warmer weather to reduce home energy use. Avoid using your oven and use a grill instead. Not only will cooking outdoors eliminate the electricity used to power the stove, but it will also avoid raising the temperature inside your home, reducing the need for additional air conditioning. You can also avoid using the oven with tasty no-bake recipes. Get creative in the kitchen and explore new ways to save energy!
